MIAMI, FL. 33173

↑ What Is the Card Security Code?

A Card Security Code is a special security feature of your Visa®, MasterCard®, Discover® or American Express® credit card.

How does my Card Security Code protect me?

Card Security Codes are not raised, so they are not scanned into standard credit card readers. In theory, these numbers are only visible to you. When you give your Card Security Code to a merchant, you assist the merchant in verifying that you, the cardholder, are placing the order.

Why do we ask for my Card Security Code when I place an order online?

We require you to enter your Card Security Code whenever you place an order online to help us detect fraudulent use of your card before your account is charged. This simple step allows us to greatly enhance the safety and security of our ordering process.

Visa®, MasterCard®, and Discover®

For Visa®, MasterCard® and Discover® cardholders, there are **3 digits** on the back of the card in the area shown by the graphic above.

American Express®

For American Express® cardholders, there are **4 digits** on the front of the card, either before or after, but offset above the 15-digit credit card number.
